Quad Series Pumps

17 Lt/min pump
Model: 4325-143

Flowjet Quad series 17.0 Lt/min pumps is the industries most powerful diaphragm pump in it's class and price range.

The Flojet Quad series pumps are engineered and constructed with the latest co-injection mold diaphragm technology, which vitually eliminates potential leak paths. This latest innovation offers unequaled pump performance and life.

Also, Flojets four chamber design allows these pumps to operate at exceptional pressures. With operating pressures exceeding 2.8 bar and self-priming capabilities exceeding 2.5 metres, Flojet Quad pumps are designed to be the most versatile pumps on the market today.

The Flojet Quad series pumps are available now in 220 volts AC models, and being made with Santo/Viton and when fitted with Viton diaphragm and check valves makes them capable of handling some tough chemicals without corroding.

Features and Benefits

- Unrivaed 17.0 Lt/min
- Low pressure
- Self-priming even when dry
- Corrosian resistant
- Easy low-cost and convenient servicing
- Long life sealed motor
